

Carlson Wagonlit Travel (CWT)

Carlson Wagonlit Travel (CWT) is a global leader specializing in business travel management and our travel counselors know that teamwork and great results have no boundary. We are proud to have been named the most admired Travel Management Company – and we are even more proud that we achieved it together. Whether we are booking government travel, advising on international security or establishing relationships with global corporations, we work as a family. We support each other. We grow as a team. And to us, that's what makes a world of difference.

Citi

Technology is taking us further than ever before. We are accelerating the design and delivery of digital solutions that transform global finance, anticipate consumer trends and stimulate growth. FinTech is key to Citi making the right decisions at the right time – for clients, for employees, and for the business.

Our team sees Citi as a technology company with a banking license. And it's no wonder, when their work involve robotics, AI, biometrics, virtual reality, and new trading platforms. Join us and you will hone your agile developments skills, program in the latest languages, develop a "cloud-first" mentality, and ultimately help maintain a network that moves trillions of dollars a day.

Join Citi and develop skills for global leadership with training and experimental learning opportunities in an inclusive culture of fairness.

Citi Service Center Poland supports countries in Europe, Asia, Africa, both Americas and Australia. Teams working in the new technologies division at Citi Service Center Poland ensure smooth operation of Bank technologies in 96 countries.

Goldman Sachs

Goldman Sachs is a leading global investment banking, securities and investment management firm that provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments and individuals.

Engineering, which is comprised of our Technology Division and global strategists groups, is at the critical center of our business, and our dynamic environment requires innovative strategic thinking and immediate, real solutions.

At Goldman Sachs, our Engineers don't just make things – we make things possible. Change the world by connecting people and capital with ideas. Solve the most challenging and pressing engineering problems for our clients. Join our engineering teams that build massively scalable software and systems, architect low latency infrastructure solutions, proactively guard against cyber threats, and leverage machine learning alongside financial engineering to continuously turn data into action. Create new businesses, transform finance, and explore a world of opportunity at the speed of markets.

Who We Look For

Goldman Sachs Engineers are innovators and problem-solvers, building solutions in risk management, big data, mobile and more. We look for creative collaborators who evolve, adapt to change and thrive in a fast-paced global environment.

Want to push the limit of digital possibilities? Start here.

MicroStrategy

MicroStrategy is a world leader in enterprise analytics and mobility software. As a pioneer of enterprise Business Intelligence solutions, MicroStrategy provides innovative software for reporting, analysis and monitoring.

Our mission is to provide solutions that will help organizations to process the vast amount of data so that they can make the most difficult business decisions and win over their competitors. In this way, they discover the power of BI.

The history of MicroStrategy began in June 1988, when the company, headed by Michael J. Saylor, with almost 700 employees on board, went public. Today, MicroStrategy has 27 local offices around the world and more than 2,000 employees. Among the clients there are over 4,000 companies, representing various sectors such as insurance, banking, media, technology and many others. These include brands such as Amazon, Guess or LinkedIn.

MicroStrategy is headquartered in Washington DC, USA, and Warsaw is the second largest branch in the world in terms of the number of employees. It is made up of more than 350 people, and there will be even more! We are constantly recruiting our team, which not only delivers and implements software for customers but also creates its new functionalities. And we're not afraid of embracing the pivots that occur in a dynamic product environment. We like a good challenge – and we're looking for others who do too.
